Instructions

Imagine that you're part of the Zillow Premier Agent design systems team, and we're going to be creating a component to display information about a single property... The designer has provided you with redlines (attached). The included HTML file already has the correct structure, but it needs you to add CSS in the HTML <head> to style these cards.

Feel free to use any resources you have available, and complete the exercise in your own time. We're hoping this exercise will be straightforward and not time-consuming. There aren't any hidden tricks or gotchas (we promise!), so feel free to email if you have questions or if something is unclear - we work very collaboratively here!

Things to consider:

- Zillow Group is a real estate company, so the property card component will be used across multiple applications and platforms. Think about ease of re-use, and how the component might behave in different contexts.

- The property images come from different sources (Zillow, Trulia, Hotpads, and more), and we don't have direct control over image size, resolution, etc.

- Are there use cases that are missing from these specs? How would you approach those?

- What feedback do you have for the designer? Do you need more information, or are there follow-up questions that you have for the designer?

- In the future, we might want to extend this pattern to support a horizontal orientation (picture to the left of text, instead of above). Are there things you can do now to make horizontal property cards easier to support later?

You do not need to address all of the above in your solution, but we may discuss them as we go over your work together.

Remember, there's no right or wrong way to approach this exercise. We're mostly looking to see how you structure your code and how you think about the problem. Good luck, and please reach out with questions!

Vertical Property Cards

FOR SALE - MLS 1234567

$750,000

3bd, 2ba, 1,310 sqft

678 Jackson St, San Francisco, CA 94241

FOR SALE - MLS 1234567

$750,000

3bd, 2ba, 1,310 sqft

678 Jackson St, San Francisco, CA 94241

Note: the number of property cards in a row depends on the available space.
If there are too many cards for a single row, they will wrap to the next row.
